

EQUIMEAL

THE BLEND SPECIALISTS

Suitable for horses at all life stages

✓ PROBIOTIC

To aid in the establishment of gastrointestinal microflora in immature animals and for maintenance of healthy animals

✓ CALCIFIED RED SEAWEED

A gentle slow release buffering agent to help prevent problems in horses and ponies with a high intake of hard feed. Useful for horses to alleviate stomach ulcers and help reduce colic

✓ 8-COMPLEX VITAMINS FOR STRESSED HORSES

✓ LOW GI WITH ESSENTIAL AMINO ACIDS

✓ HIGH PROTEIN FOR MUSCLE DEVELOPMENT

✓ IMPROVES HOOF HEALTH

✓ IMPROVES FERTILITY

FEEDING INSTRUCTION

FEEDING RATIO OF 2.5 - 3 CHAFF TO 1 EQUIMEAL.
MIX WITH OATEN/WHEATEN/LUCERNE CHAFF
- DIVIDED INTO TWO OR MORE FEEDS.
DAMPEN FOR BEST RESULTS.

TYPICAL ANALYSIS

Energy	11.75Mj	Iodine	0.76mg
Crude Protein	25%	Cobalt	0.36mg
Calcium	12.5g	Lysine	16.6g
Phosphorus	9.8g	Methionine	1.07g
Potassium	17.3g	Threonine	2.14g
Chloride	8.9g	Vitamin A	8571IU

TOPSTOCK EQUIMEAL

Suitable for horses at all life stages

THE BLEND SPECIALISTS

28 great reasons to feed TOPSTOCK EQUIMEAL

1. Easy to use, just add to chaff and add water, no extra supplements required.
2. Good all-round feed for all disciplines and levels of work.
3. Low GI cool feed – doesn't make horses hot
4. Balanced for use in all life stages.
5. Available in bulk.
6. More concentrated, end up feeding less than you would a similar pelletised product
7. Save money by feeding less.
8. Essential amino acids for growth and development and lactation.
9. B complex vitamins for stress horses
10. B vitamins assist with metabolism and help lower chance of tying up.
11. Electrolytes for replacing those lost in sweat during exercise.
12. Minerals balanced for bone growth and maintenance
13. Contains vitamin E and selenium which are deficient in WA pastures and hay.
14. Good creep food for foals.
15. Good for stallions in breeding work, provides all needed for good fertility and shine.
16. Corrects deficiencies in the diet so can better utilise roughages provided to them.
17. Tasty, horses like it
18. Can feed wet or dry.
19. Once wet, does not sift out of chaff like supplement pellets
20. Does not swell/expand, so low risk of choke/bloat.
21. Biotin for good hoof and hair condition without over supplementing.
22. Contains lysine which is low in grains, and helpful for muscle development and maintenance.
23. Vegetable protein meal based.
24. Easy to store.
25. Long shelf life.
26. Matches well with Topstock loose mix horse lick – for managing deficient pastures.
27. NOW WITH PROBIOTIC. To aid in the establishment of gastrointestinal microflora in immature animals and for the maintenance of healthy animals.
28. NOW WITH CALCIFIED RED SEAWEED. Calcified red seaweed has a strong and persistent buffering capacity that may assist with maintaining a higher pH over a prolonged period of time.

Calcified red seaweed is highly bioactive and has a superior absorption when compared to traditional sources of calcium.

A gentle slow releasing buffering agent to help in the prevention and solution of Acidosis problems in horses and ponies on a high intake of hard feed.

Very useful for horses with problems with stomach ulcers.
